Flag Animated with Bones

Manual

Ver 1.2.0

Folder Structure

This folder will contain all assets created by CatStudio upon purchase and import.

Contains prop assets from CatStudio. Imported prop assets will be added here.

Manual and Readme files.

Files that make up the flag assets are stored here.

Assets used in the sample scenes are stored here.

Sample scenes are stored here.

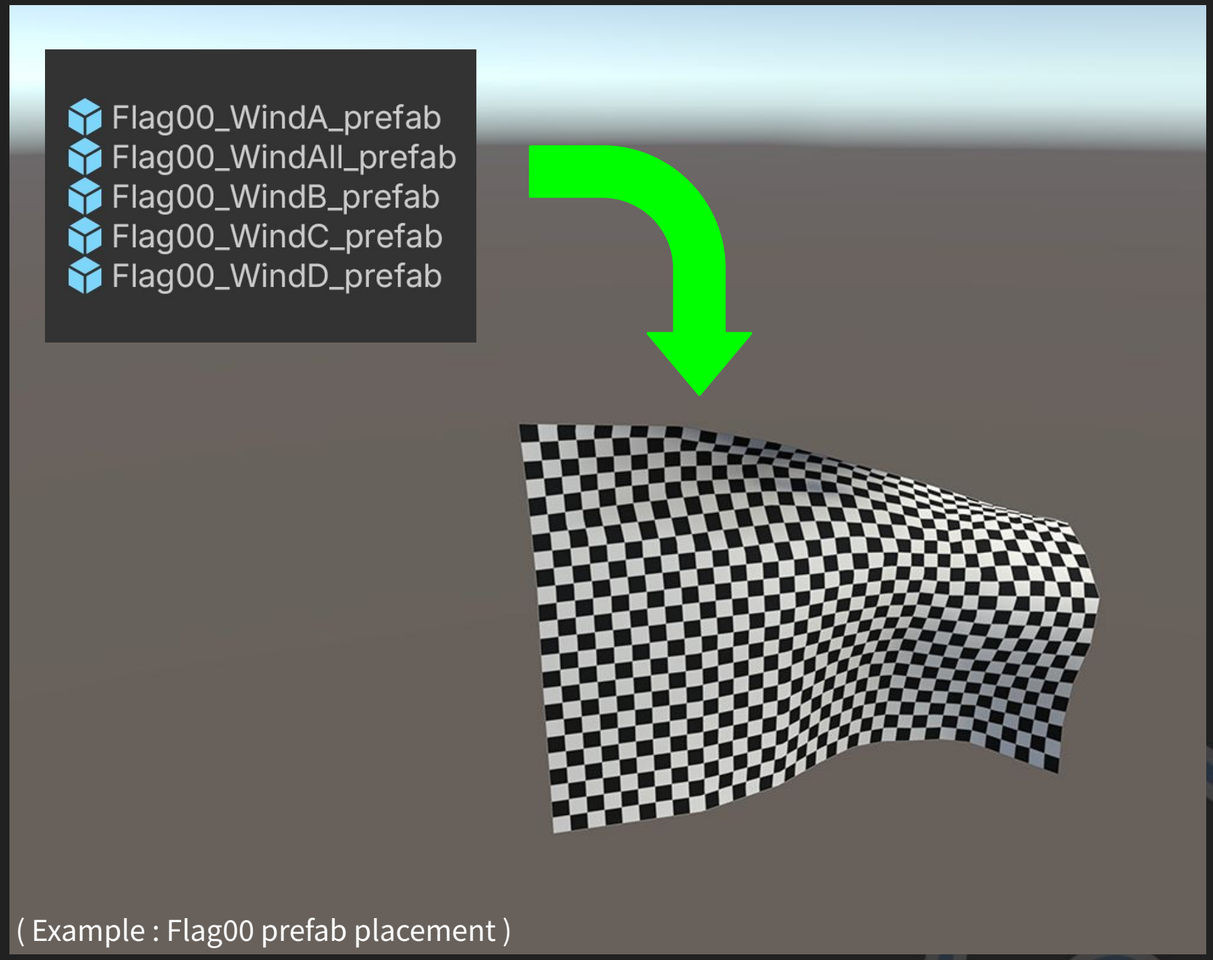

https://www.catstudio.jp/

Overview of Package Assets

Just place it and let it wave in the wind — a lightweight flag asset for smooth real-time use.

By simply placing the preconfigured prefabs included in this package into your scene, you can play animations such as flags waving in the wind.

LOD switching is also preconfigured.
Since the animations are driven by bone animation, cloth simulation is not used.

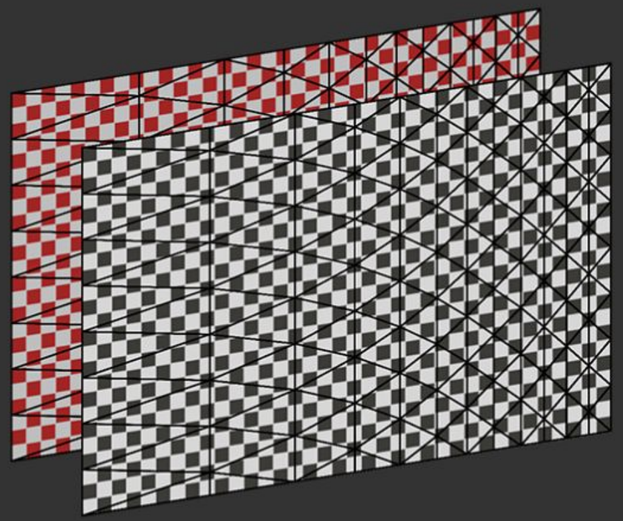

(Example : Flag00 prefab placement)

https://www.catstudio.jp/

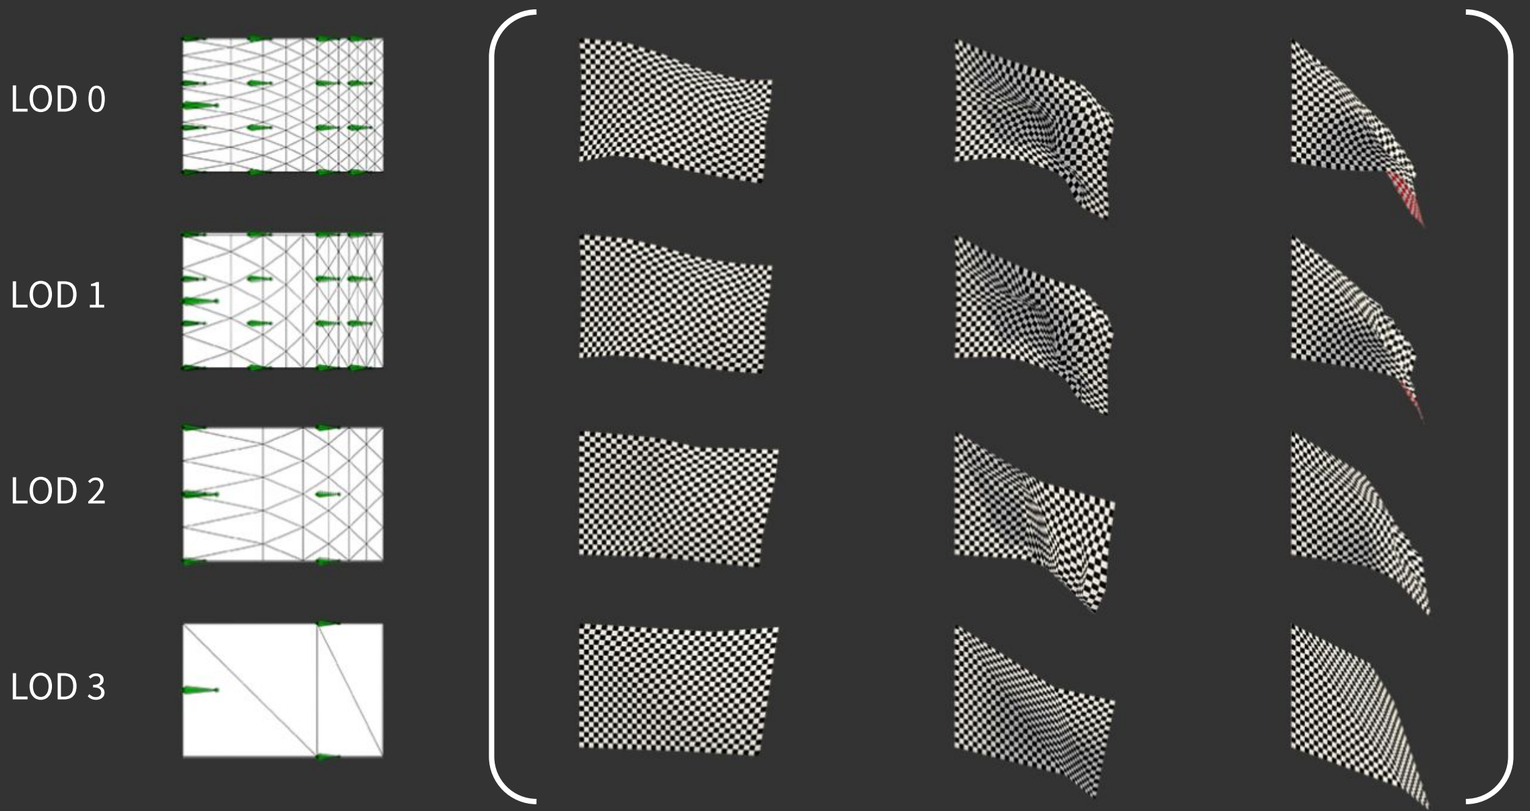

Structure and Animation

The flag model consists of two meshes with identical topology, layered back-to-back to represent the front and back sides.

Since the bone layout differs for each LOD, dedicated animations are used for each LOD.

(Example: Flag00 modeling structure)

(Example: Flag00 LOD bone layout patterns and animations)

File Names and Contents

◇Files are categorized by "role"
using a suffix at the end of the file name.

_mdl	------	Model
_anm	------	Animation
_ctrl	------	Animator
_prefab	------	Prefab

◇Strings such as “_l0” after the model name
indicate the "LOD number".

_l0	----------	LOD0
_l1	----------	LOD1
_l2	----------	LOD2
_l3	----------	LOD3

◇The part between the "LOD number" and the "role",
such as “_WindA”, represents the animation name.
(Example: Flag00)

_WindA	-------	Wind Strength: Breeze
_WindB	-------	Wind Strength: Weak
_WindC	-------	Wind Strength: Medium
_WindD	-------	Wind Strength: Strong

Example: Flag00

- **Flag00_l0_mdl**
  →Flag00, LOD0, Model
- **Flag00_l1_WindA_anm**
  →Flag00, LOD1, Breeze, Animation
- **Flag00_l2_WindB_ctrl**
  →Flag00, LOD2, Weak, Animator
- **Flag00_WindC_prefab**
  →Flag00, Medium, Prefab
- **Flag00_prefab**
  →Flag00, Without Animation, Prefab

https://www.catstudio.jp/

Files labeled “ALL”

Animators with “All” in the file name include all animations for the corresponding flag model.

All parameters are preconfigured, allowing wind strength to be switched via scripts.

(Example: Flag00 4 variations: WindA, WindB, WindC, WindD)

Prefabs with “All” in the name are prefabs that have the “All” Animator assigned.

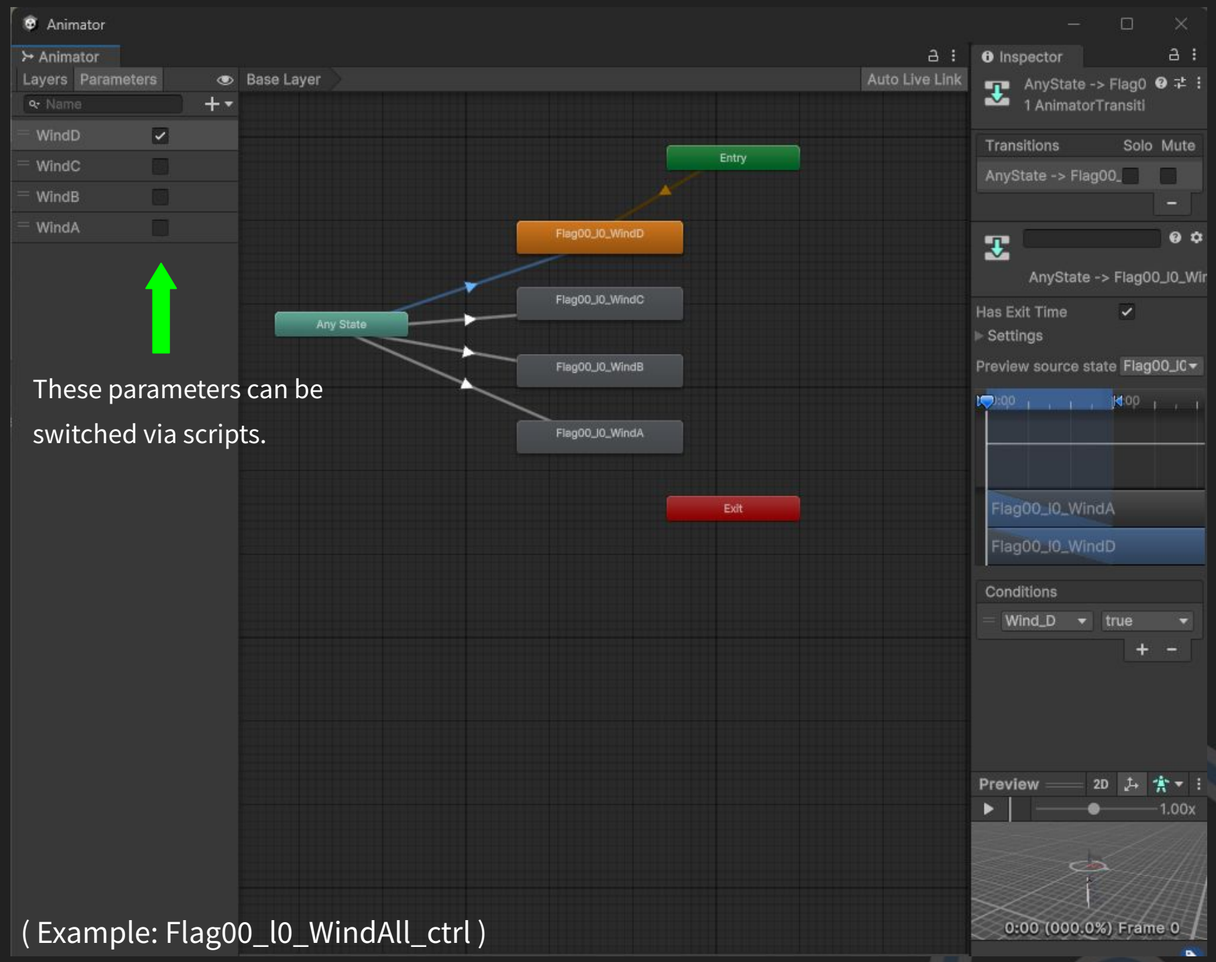

▼Animator（All）

- Flag00_l0_WindAll_ctrl
- Flag00_l1_WindAll_ctrl
- Flag00_l2_WindAll_ctrl
- Flag00_l3_WindAll_ctrl

▼Prefab（All）

- Flag00_WindAll_prefab

(Example: Flag00 “All” Animator & Prefab)

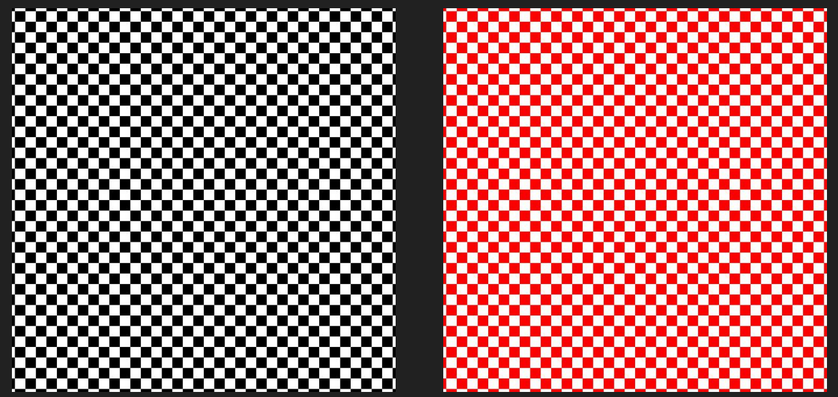

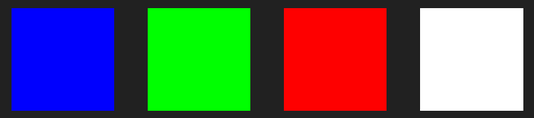

(Example: Flag00_l0_WindAll_ctrl)

Materials and Textures

The assets in this package include separate materials for the front and back sides, along with sample textures.
When preparing your own original textures, please replace the sample textures as needed.
In addition, solid-color textures and other variations are included, allowing the assets to be used for a wide range of purposes.

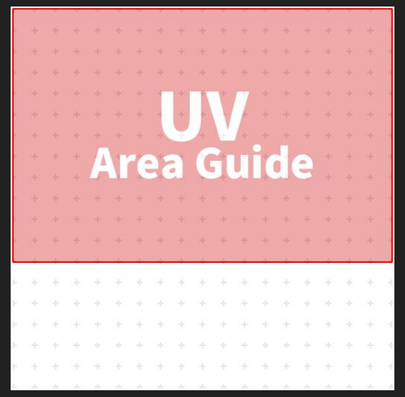

(Example: Flag00 Setup)

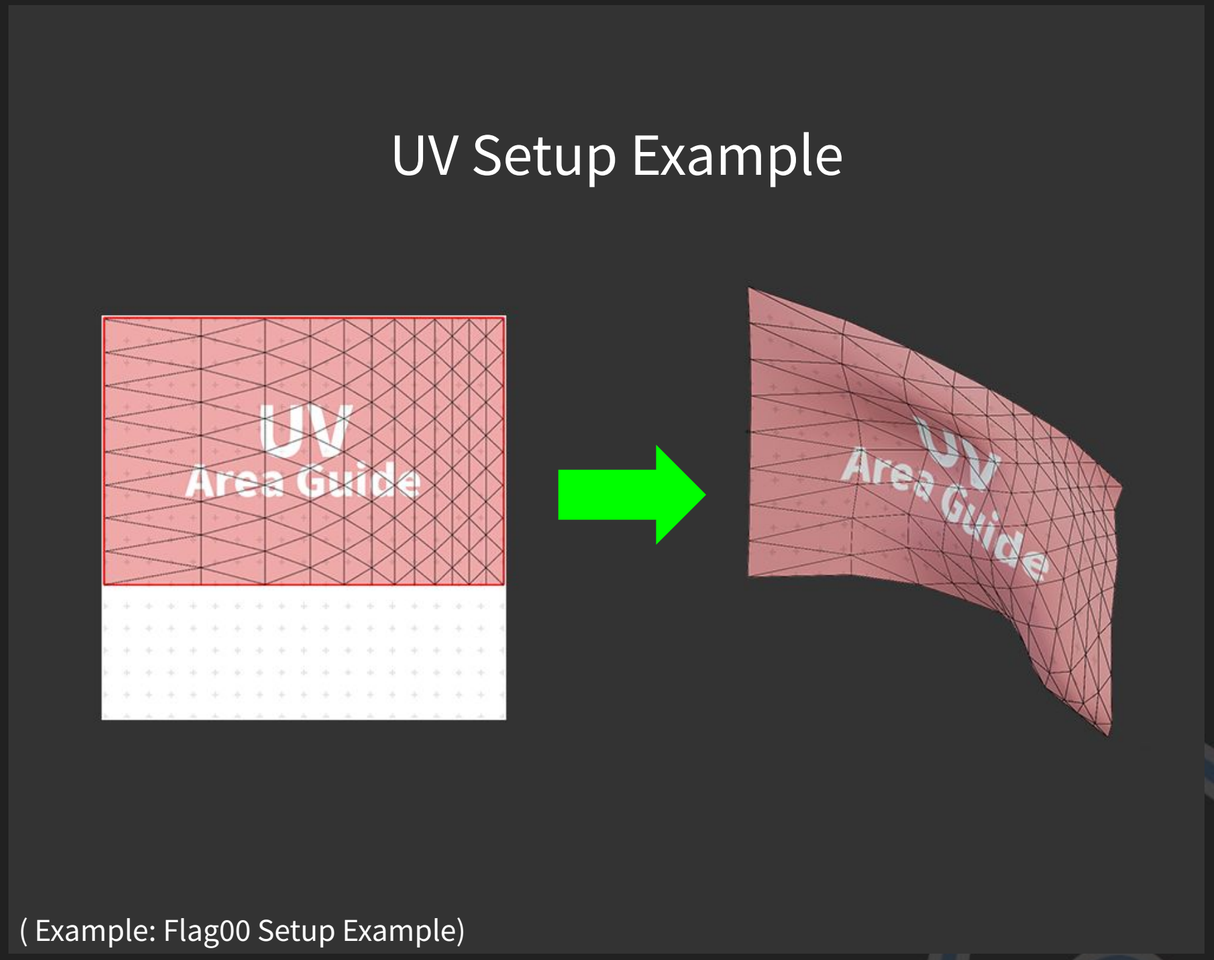

https://www.catstudio.jp/

UV Area Guide

The assets in this package include textures that clearly show the UV usage areas at a glance.
These textures can be used as guides when replacing textures.

(Example: UV Area Guide Texture for Flag00)

(Example: Flag00 Setup Example)

About the Sample Scene 1

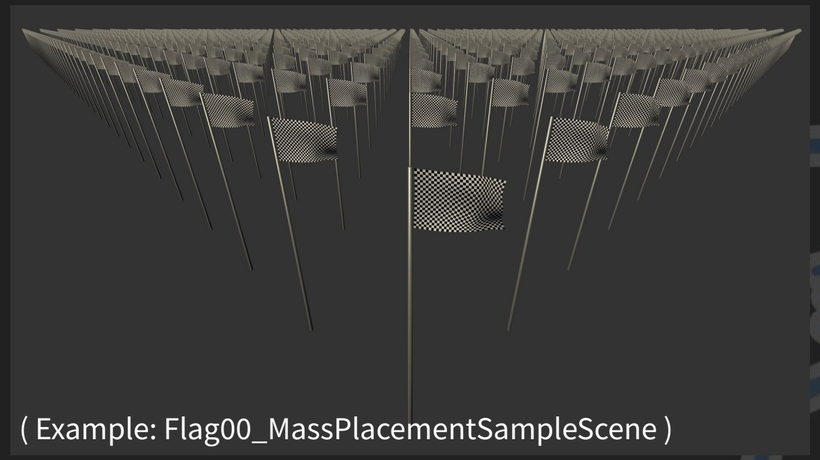

Sample scenes are provided for each asset in this package.
You can use them to check the look and behavior of the assets.

It is stored in the following location within the project folder:
Assets\CatStudio\PropSeries\FlagAnimatedWithBones\SampleScenes

Example: Flag00
◇ Flag00_AnimationSampleScene
This sample scene allows you to view all animations at a glance.

◇ Flag00_MassPlacementSampleScene
This sample scene allows you to check the behavior when a large number of flags are placed.

(Example: Flag00_AnimationSampleScene)

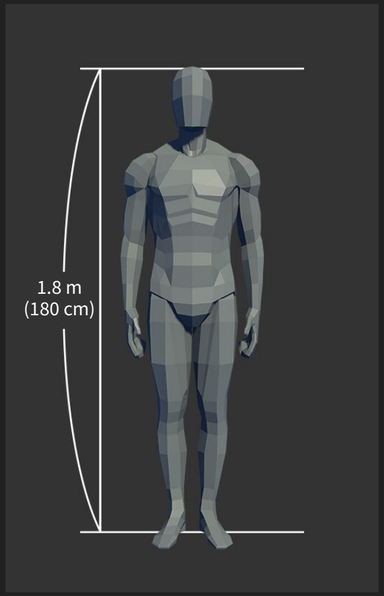

(Example: Flag00_MassPlacementSampleScene)

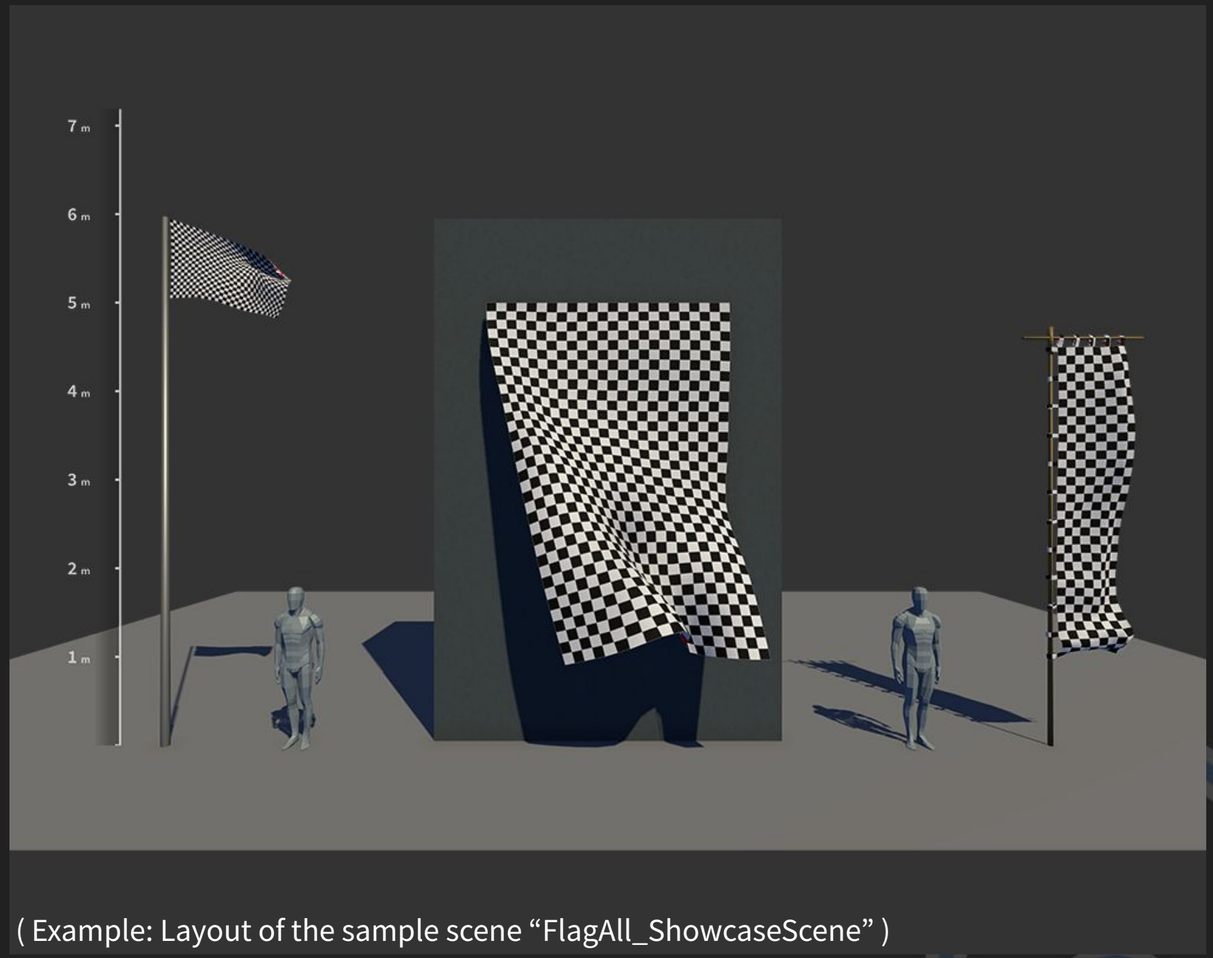

https://www.catstudio.jp/

About the Sample Scene 2

The “FlagAll_ShowcaseScene” sample scene allows you to view a list of all flag models contained in this package.

The human model placed in the scene is a sample model intended to represent a male who is 1.8 m (180 cm) tall.
You can use it to compare the sizes of each flag.

(Example: Layout of the sample scene “FlagAll_ShowcaseScene”)

https://www.catstudio.jp/

Simple Assets for the Sample Scene

This package includes simple assets used in the sample scenes.
Since these are simplified models, they are not intended to be used as final-quality props.
Please replace them with your own assets as needed.

It is stored in the following location within the project folder:
Assets\CatStudio\PropSeries\FlagAnimatedWithBones\SampleAssets

The main simple assets are as follows:

◇ Human model
This is a human model used in the sample scenes.

◇ Pole model
This is a simple pole model used in the sample scenes.

◇ Wall model
This is a simple wall model used in the sample scenes.

◇ Ruler model
This is a simple ruler model for comparing the scale of models in the scene.
